# How to prepare your data for G8

This short guide is to help you send your G8 data to Election Workshop in the correct format and in line with GDPR.

This guide only deals with how to format the information, not what the information should be or how to use Connect.

If you need help to create your list, or decide who the letters should go to, then please contact your ALDC or LDHQ field officer for advice and support.

1) When you have built your list, run the list and click 'Export'
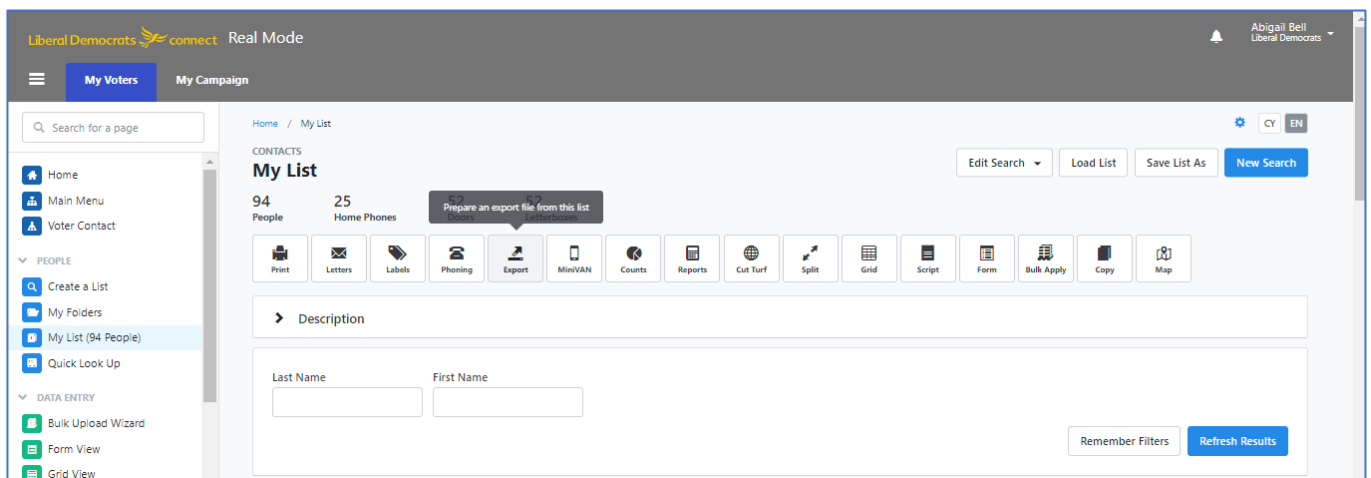

2) This takes you to the Export Wizard. Recent changes to Connect mean that the default export settings now don't export the different lines of an address into a column per address line. To fix this, when selecting export options, go to customise export, and tick the box that says

"Export address lines 1,2 and 3 into separate columns"

Export Wizard

Customize Export

Householded Mailing List
One record for every mailable household in your list, including just the fields you need to prepare a mailing

Householding	Include one record per address ⌄
Household Label	The Smith Family ⌄
Middle Name	Do not include middle names ⌄

☑ Include Phone
☐ Export address lines 1, 2, and 3 into separate columns

File Type ⦿ Excel File   ○ Text File

Export File Name [   ]
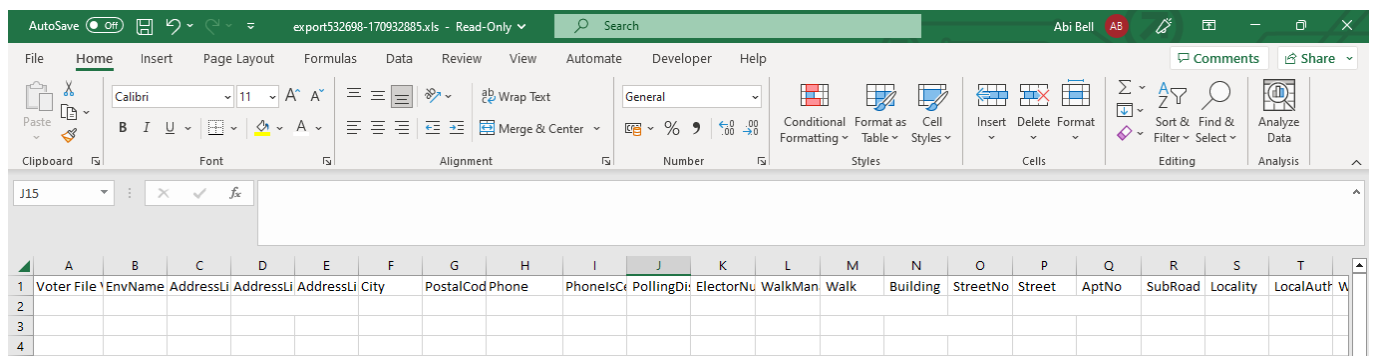

3) Now click on 'Export As' and select Excel

4) Connect will now process your export and you can download it
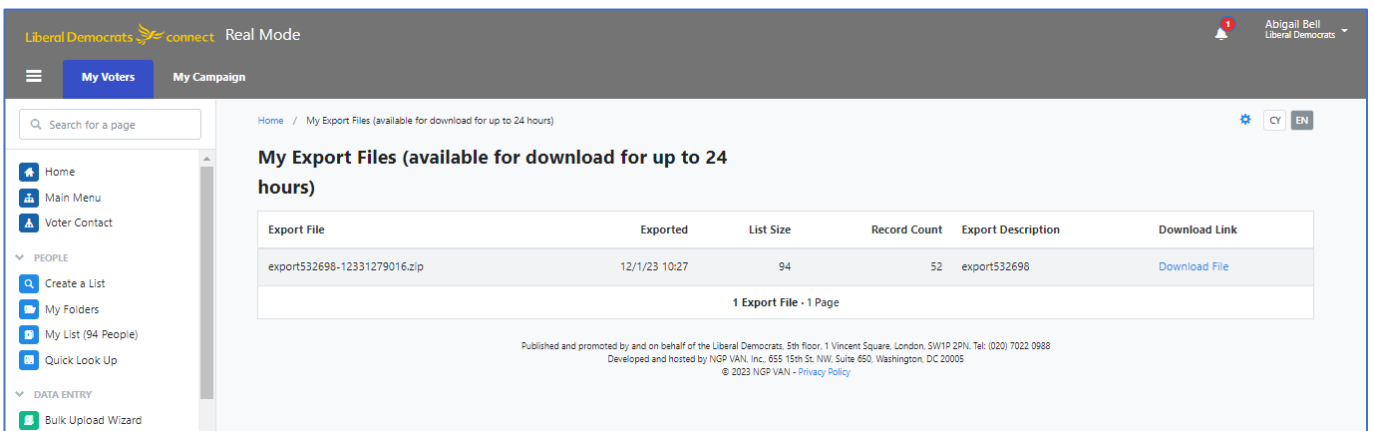

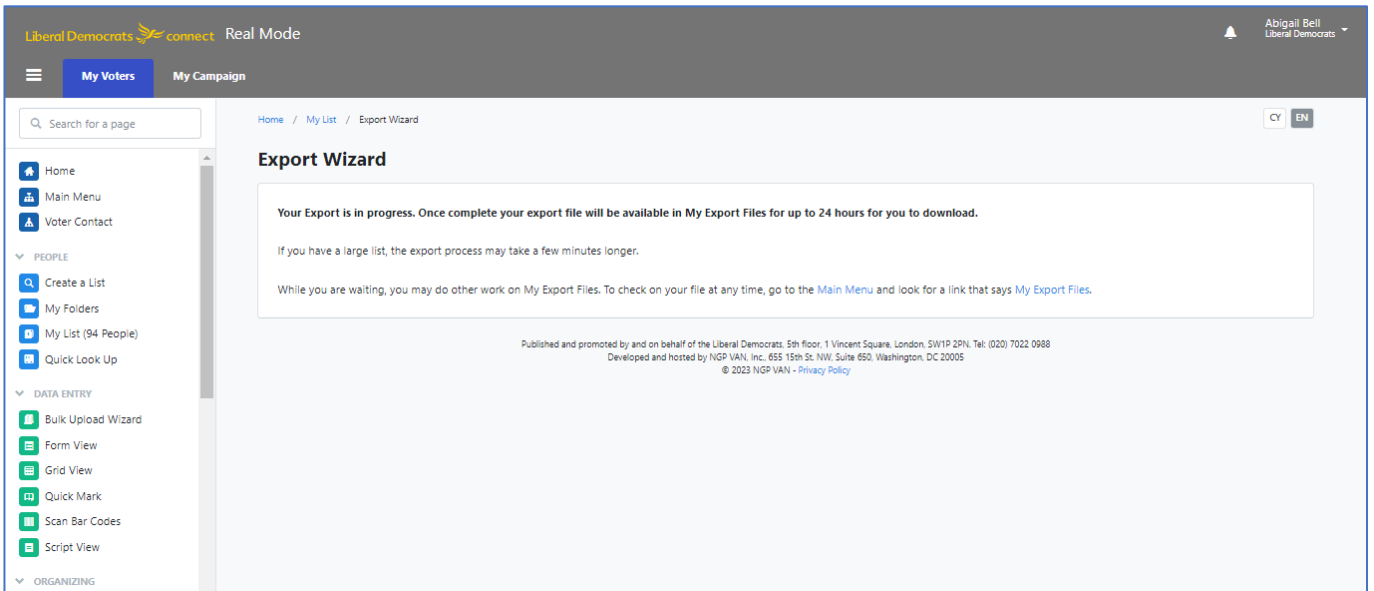

5) Once your download has completed, open the document. There are a lot of columns – don't worry about this!

It is <u>VITAL</u> that these column headings are <u>NOT</u> changed. These will be the merge field used to create your letters.

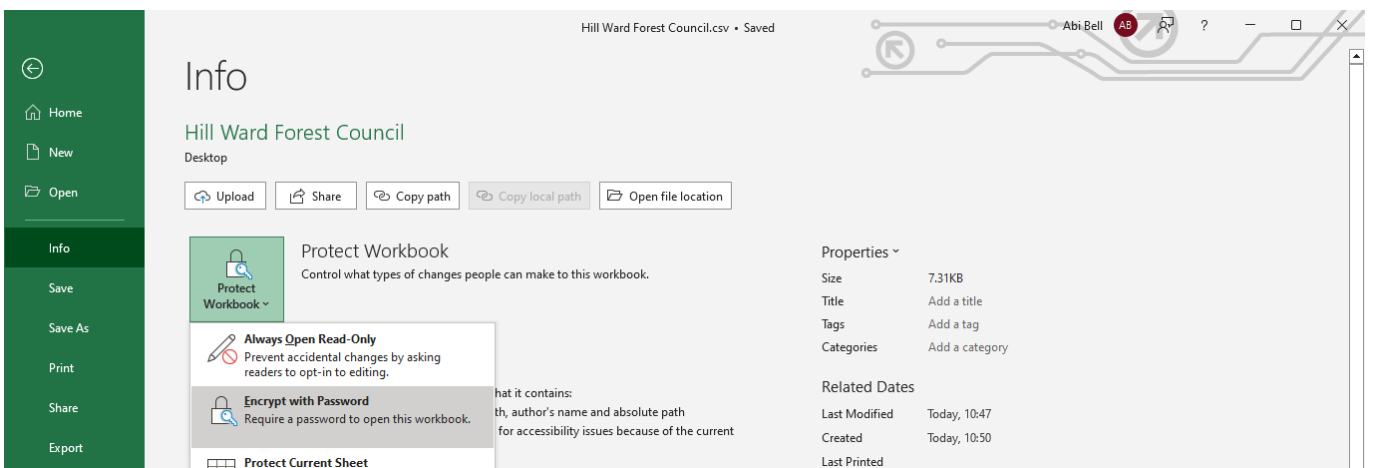

6) You now need to save your spreadsheet and password it. Click 'Save As' and name your file using the Ward Name followed by the Council, i.e. Hill Ward Forest Council. Make sure the format is Excel Workbook. Make sure you save it where you can find it!
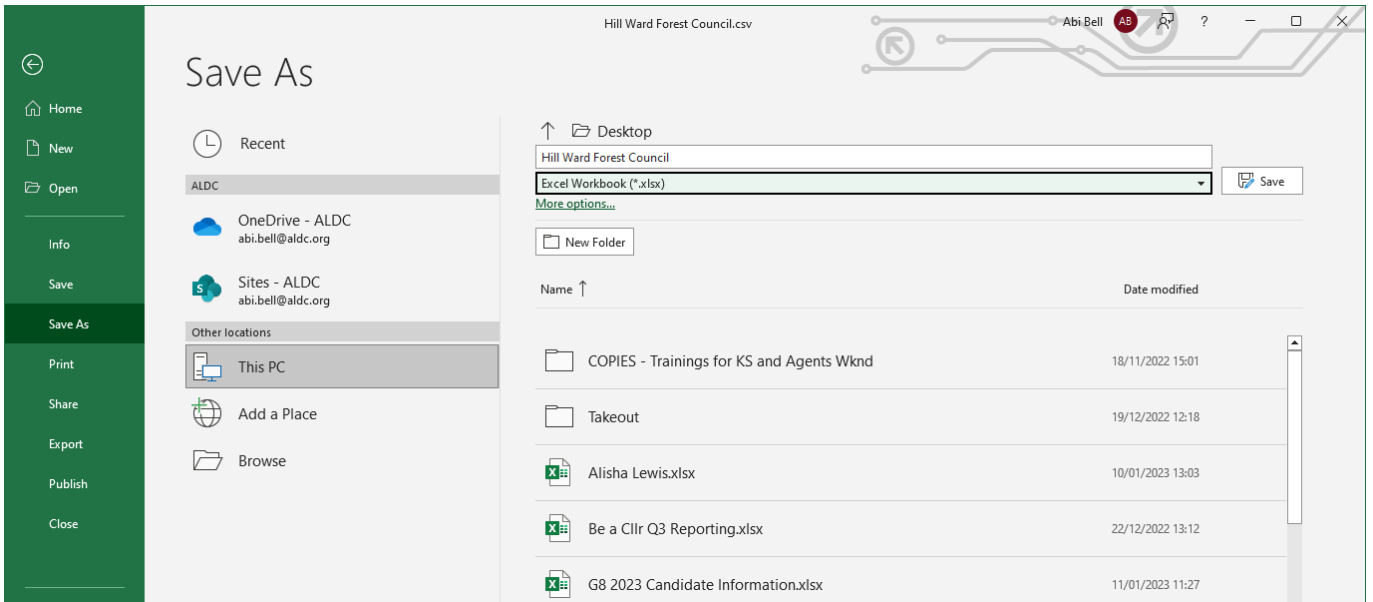

7) To password your file, click 'File' and then select 'Info'
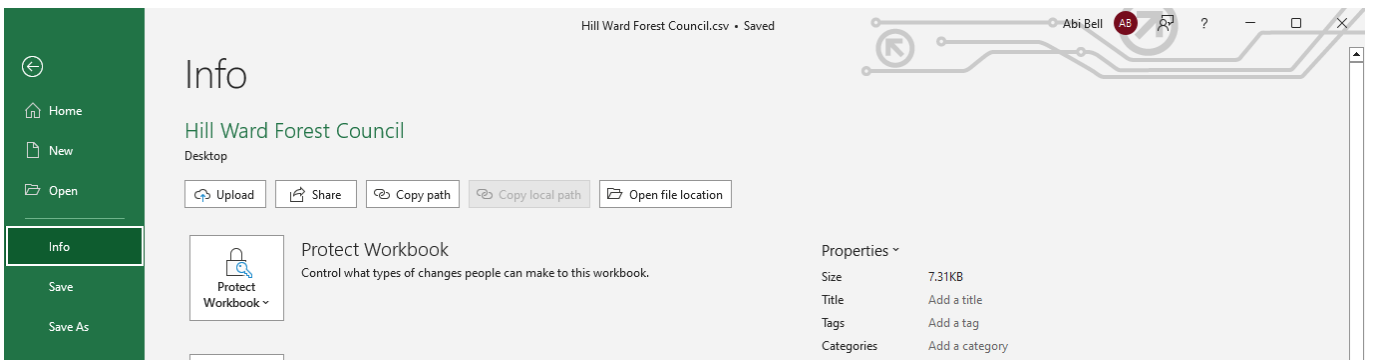

8) From here, select 'Protect Workbook' and then 'Encrypt with Password'

9) You will then be asked to type in a password, twice. Make sure to keep a note of the password.

10) Email the spreadsheet to enquiries@electionworkshop.co.uk with the subject heading of the email detailing G8, the ward and local authority

11) Once you have sent Election Workshop your data, you will need to send the password. This is a specific phone number (which is not any of the staff phone numbers) for you to text. This means that only the staff member dealing with your data knows the password.

TEXT 07852 557530

Your text should include your name, your ward/constituency, your mailing project (e.g. G8) and your password.

Please **do not** send passwords by email or WhatsApp, and please be sure to send the password to the right phone number.
